#1

Received an email from Deb Steggles requesting TLT Board support for the work and expenses at the 3rd Street Road end:

Township residents would like improvements made to the 3rd Street Lake access site to provide safe access to the lake and to clean up the area.

The items we would like to address:

- **Secure handrails/possibly replace- currently they are not secure and are a safety issue**
- **Provide treads on the stairs to prevent slipping.**
- **Clear rocks at water entry at bottom of stairs-approx. 3 feet for secure footing when entering water**
- **Clean up the shoreline- remove the leaves, vines growing on trees, remove sumac**
- **Cut back vegetation by the stairs and railings**

All material requests we will requested to the Township Supervisor for purchase by the township as needed. Residents will do clean up and repairs. Will consult with township to make sure handrail improvements are up to code.

Over the years the grass was mowed by Tom Fitzsimmons. The Fitzsimmons family continue to mow the access and the neighbors are willing to assist.

Bob Cook indicated that a survey of the access site has been ordered. At one time the access was marked by split rail fence bordering both the south and north boundaries. The south split rail fence is still there but the north side split rail fence was removed. Once the survey has been completed the residents are requesting that a split rail fence be installed to identify the access boundaries. The intention is to provide safe access to the lake for the residents of Torch Lake Village and to make sure that the site is maintained.
